

Flotilla - Joystick

PIM034

The Joystick module is an analog joystick with a click button. It's ideal for using as a game controller, or to control a robot.

Features:

- Analog joystick with click button
- Perfect as a game controller
- Micro USB connector

Find Flotilla Cookbook recipes that use the Joystick module at <http://learn.flotil.la/cookbook/> or use Joystick with Rockpool at <http://flotil.la/rockpool/>

Or use our Python Flotilla API to control the Joystick module.

Note: Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
